

Salesforce Dev Notes Content Roadmap

Phase 1: Salesforce Fundamentals (Articles 1-10)

1. What Is Salesforce? A Beginner's Guide
 2. Salesforce Architecture Explained
 3. Understanding Standard vs Custom Objects
 4. Salesforce Data Model Explained
 5. Understanding Relationships in Salesforce
 6. Mastering Record Types
 7. Page Layouts vs Lightning Record Pages
 8. Profiles, Roles, and Permission Sets
 9. Salesforce Security Model Explained
 10. Salesforce Order of Execution
-

Phase 2: Apex Development (Articles 11-25)

1. What Are Apex Triggers?
 2. Understanding Trigger Context Variables
 3. Before vs After Triggers
 4. Bulkification in Apex
 5. Governor Limits Explained
 6. Apex Collections: List, Set, and Map
 7. SOQL Fundamentals
 8. Advanced SOQL Techniques
 9. SOSL Explained
 10. Exception Handling in Apex
 11. Future Methods
 12. Queueable Apex
 13. Batch Apex
 14. Scheduled Apex
 15. Apex Best Practices
-

Phase 3: Trigger Framework Series (Articles 26-35)

1. Why You Need a Trigger Framework
2. One Trigger Per Object Pattern
3. Trigger Handler Pattern
4. Service Layer Pattern
5. Domain Layer Pattern
6. Unit of Work Pattern
7. Enterprise Design Patterns

8. Preventing Trigger Recursion
 9. Trigger Framework Example Project
 10. Trigger Framework Interview Questions
-

Phase 4: Lightning Web Components (Articles 36-50)

1. Introduction to Lightning Web Components
 2. Creating Your First LWC
 3. Component Lifecycle Hooks
 4. Data Binding in LWC
 5. Parent-to-Child Communication
 6. Child-to-Parent Communication
 7. Working with Apex in LWC
 8. Wire Service Explained
 9. Lightning Data Service
 10. Navigation Service
 11. Pub/Sub Pattern
 12. Dynamic Components
 13. LWC Performance Best Practices
 14. LWC Design Patterns
 15. Building a Complete LWC Project
-

Phase 5: Salesforce Flow (Articles 51-60)

1. What Is Salesforce Flow?
 2. Record-Triggered Flow
 3. Scheduled Flow
 4. Screen Flow
 5. Auto-Launched Flow
 6. Flow Best Practices
 7. Error Handling in Flow
 8. Flow vs Apex
 9. Flow Performance Optimization
 10. Real-World Flow Examples
-

Phase 6: Integrations (Articles 61-70)

1. Salesforce Integration Overview
2. REST API Basics
3. Creating REST APIs in Salesforce
4. Consuming REST APIs in Apex
5. Named Credentials
6. Authentication Methods

7. Platform Events
 8. Change Data Capture
 9. Webhooks in Salesforce
 10. Integration Best Practices
-

Phase 7: Agentforce & AI (Articles 71-80)

1. Introduction to Agentforce
 2. Agentforce Architecture
 3. Creating Your First AI Agent
 4. Agentforce Builder Explained
 5. Agent Script Fundamentals
 6. Multi-Agent Orchestration
 7. Agentforce Security Considerations
 8. AI Governance in Salesforce
 9. Agentforce Best Practices
 10. Future of AI in Salesforce
-

Phase 8: DevOps & Deployment (Articles 81-90)

1. Salesforce DX Explained
 2. Scratch Orgs
 3. Source-Driven Development
 4. Git for Salesforce Developers
 5. CI/CD Fundamentals
 6. GitHub Actions for Salesforce
 7. Deployment Strategies
 8. Package Development
 9. Managing Multiple Environments
 10. DevOps Best Practices
-

Phase 9: Advanced Architecture (Articles 91-100)

1. Salesforce Well-Architected Framework
2. Large Data Volume Strategies
3. Platform Cache Explained
4. Event-Driven Architecture
5. Asynchronous Processing Patterns
6. Data Migration Strategies
7. Security Architecture
8. Enterprise Integration Patterns
9. Salesforce Technical Architect Roadmap
10. How to Become a Salesforce Architect
